## V-130 ALUMINIUM LETTERS BENDING MACHINE

### **Characteristics:**

1. Five-axis construction for feeding, lifting, cutting, and bending one-time forming to ensure accurate and stable cutting and bending .
2. With brushless DC cutting motor, adjustable speed, suitable for various materials.
3. With the closed loop self-test system, the whole deviation is less than 0.1mm comparing with the acrylic plate.
4. Imported side rails to position cutting, to ensure the cutting stability
5. Rebound coefficient of Arc Bender has intelligent compensation, to ensure the accuracy of various material forming.
6. One-button operation, very easy to use. Cost-effective, stable cutting, low noises
7. Self-innovated Software, easy operation.
